

# ModusBox Partner Program for Mojaloop

Recognizing the significant opportunities that Mojaloop implementations offers, ModusBox has developed a program to train and certify other System Integrators.

## Partner Program Components

**On-premise Training:** ModusBox can train your team in a conventional classroom-type setting on the principles and components of the Mojaloop platform. Topics include every aspect of the basic concepts, system usage, infrastructure requirements, and implementation and monitoring.

**Online Training:** For those who cannot attend an in-person training, ModusBox offers online video training. Training modules include:

- Databases
- Architecture
- Data Flow
- Infrastructure
- Docker
- Kubernetes
- Helm
- Workbenches
- Monitoring

**Certification:** Upon successful completion of a track, participants are encouraged to take a certification exam to prove their competency in the subject. Three certification levels are currently offered.

- MCA: Mojaloop Certified Advisor
- MCI: Mojaloop Certified Installer
- MCS: Mojaloop Certified Support

## Support for Large System Integrators

In addition to our training and certification program, ModusBox can work with large system integrators, enabling their teams to learn the platform and successfully complete enterprise implementations.

If you're interested in more information, talk to a ModusBox team member or email us at [hello@modusbox.com](mailto:hello@modusbox.com).
